

Design & Project Management

www.trafficsolutions.co.uk

Working with customers to produce the right results within very short time spans and within budgets, has enabled Traffic Solutions to be one of the fastest growing traffic engineering companies in the UK

From traffic signal designs, site supervisions & project management, to travel surveys, safety audits and traffic modelling, Traffic Solutions provides complete packages to customers.

Along with our mobility division, we can provide a complete ‘Design and Build’ service with full project management if required.

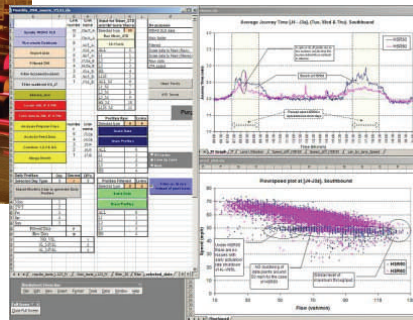

Innovative design solutions

Designing traffic signal junctions, pedestrian crossings, roundabouts, car parks and road and drainage layouts are just some of the services offered. Using the best engineers in the business, we can always produce quality schemes and design options.

“Getting the attention to detail right is the key to our successes...”

Design services offered include:

- Traffic signal junctions and crossings
- Traffic modelling
- AutoCAD services
- Road layout design
- Home zones
- Drainage layouts
- Safe routes to school schemes
- TR2500 and MOVA/SCOOT designs

“Quick Win schemes are our speciality...”

Professional services

Designs for traffic schemes are only part of the solution clients require. By offering professional client liaison and management consultancy services, we can satisfy clients with revenue and capital reductions. Providing cost benefit and business strategies are important services our customers receive. Full customer satisfaction is our aim.

Management and consultancy services offered:

- Project management (Prince 2)
- Client to contractor co-ordinations
- ITS and UTMCI initiatives
- LTP & KPI management services
- Travel route planning & surveys
- Developer enquiries
- Site supervisions
- In-house staff support

Quick Win schemes are time intensive projects we are often asked to undertake, and are very successful at them. From motorway junction designs, traffic signal

operation designs, commissioning to testing, we ensure schemes are completed on time & within budgets.
