## Environmental Division

### Need to reduce maintenance?

Our products allow assets to be self cleaning free from grime, and reduce corrosion and weathering.

### Want to increase profit margins?

Our cleaners and protective coatings reduce man hours on site, meaning more efficiencies for your organisation.

### Why choose us?

The safe working practices of the traffic & highway sector is our priority. Offering award winning products for the built environment, enables us to be at the forefront of safe working practices and CDM regulations. Our products are created to reduce the use of chemicals in our industry from cleaning & maintenance regimes. Maintaining assets and reducing revenue straining costs. Protecting the infrastructure with non-chemical solutions, with a guarantee of a year 1 return of investment for the client is a certainty.

**No VOC's present**  
(Volatile organic  
compounds dangerous to  
the environment)

## Product Range

The **Earth Friendly (EF) Range** is an innovative, safe and toxic free cleaning liquid range. Offered in 250ml and 500ml bottles (or larger if needed), the EF Range of products are an easily portable way for contractors to clean assets and remove grime and graffiti.

**EF100** is an everyday cleaner for removing stubborn dirt and grease off any traffic product or street furniture.

**EF200** is a stronger but safe cleaner for removing dirt ingress, stubborn moss and algae attacks and light graffiti tags

**EF300** is our industrial strength graffiti remover. It removes most graffiti tags, without the need of closing off areas to the public. It is extremely safe and non toxic. Our challenge is to get the traffic industry maintaining the infrastructure without using toxic or chemical based cleaners or protection coatings.

**Tecqua** is a world first. It is the most advanced nanotechnology liquid available. Patent protected and manufactured in Europe, it is a multi award winning product. Winner of two Green Apple Awards by the Green Organisation.

**Tecqua** is completely invisible, non detectable and completely chemical free. It is pure silicon dioxide (SiO<sub>2</sub> – the second most abundant natural element on the planet) 5000 times thinner than a human hair, **Tecqua** can protect any surface from graffiti, dirt ingress, grime, moss, algae, rust, bacteria and microbe attacks. When applied to street furniture or structures, it reduces the cleaning needs by up to 90% **Tecqua** can give a client a 1st year return of investment – including application costs. Many world leading manufacturers and public bodies now use **Tecqua** on their assets and products to reduce maintenance, save revenue costs, and extend the life of the asset.

### Why choose Tecqua and Earth Friendly Products?

Tecqua is recommended by manufacturers and public bodies for protection of the public realm. The EF Range is the only 'easy to carry' range of cleaners to reduce a contractor's time on site and minimise the use of jet sprays, traffic management and health and safety risks.
