ITSAM - Intelligent Transport Systems Approvals Manager

ITSAM is a purpose-built Web-based solution providing a new way of working that eradicates the problems of lost, missing and out of date documents and provides new levels of efficient and collaborative working. Able to be used in the office, on-site or at home; ITSAM provides unrivalled traffic signal and ITS document control and quality assurance approval processes. If you are involved with, or responsible for, traffic signals and ITS, then this solution will make your life much easier. ITSAM is a secure and effective system that helps you manage and control the ever increasing volume of information, documents, drawings and design files.

ITSAM is the world's first internet based ITS Quality Assurance System which will:

- * Eliminate LOST,MISSING or OUT OF DATE documents
- * Minimize PAPERWORK
- * Provide a framework for BEST PRACTICE
- * Improve EFFICIENCY
- * Help MITIGATE LITIGATION and enhance organisation reputation
- * Generate COST SAVINGS and reduce CARBON EMISSIONS through reduced printing, photocopying & travel
- * Incorporates ITS approval processes
- * Follows DfT code of practice for signal design & implementation

Overview

A complete web based fully secure (Tier 1) document control program, ITSAM is an easy to use everyday tool for ITS, traffic signal and highway engineers and managers. Ensuring full confidence in the data being used, sent and received by outside contractors, ensures that ITSAM reduces costs, delays in workflow processes and the risk of litigation. Using a simple search facility, any data can be found by any means. Whether it be by a nickname or its official index I.D number.

As ITSAM is web based it can be accessed securely from anywhere in the world, ensuring any external consultants can upload information without having to email or use the post. All documents can be time stamped, approved or rejected by the client. With a full map based and metadata capability, sites can be located by word and location searches quickly. This is not just another asset management program. It is far more than that. It is a full, safe, secure information, asset and document repository, which allows full auditing to be carried out.

ITSAM allows any highway authority to once again be in complete control, and be the customer once again. Reducing the risk of litigation, accidents and improving safer more efficient working practices, ITSAM is the answer.

The Complete Solution

Leveraging our extensive industry knowledge, skill and expertise Traffic Solutions is able to provide traffic professionals with a ground breaking solution to the common problem of controlling and managing complex and valuable engineering documents, maps, drawings, etc so that engineers can be more effective. Being web based enables the ITSAM solution to be easily deployed and used with no complex or expensive configuration or installation.

Nowadays, traffic signalling departments are being stretched to breaking point and if the department still relies on traditional document filing techniques then individual staff knowledge becomes the weakest link and teams become ineffective and inefficient. As departments are constantly downsized and reorganised management can no longer rely on the knowledge of individuals and it is soon discovered that any team is only as good as its information and document filing systems.

To eliminate the issues of document filing ITSAM has been designed by engineers for engineers and Traffic Solutions recognise that by delivering such a product Traffic signalling departments can release their staff for more valuable work.

ITSAM is specifically designed BY Traffic Signal Engineers FOR Traffic Signal Engineers
