Consultancy - Consult, Design, Engineer

Need an answer fast?

We can provide 'quick win' design & management solutions and liaise with your clients & suppliers to achieve the right results for you within budget.

Want to reduce costs?

We achieve innovative and cost efficient designs and studies to reduce the burden of capital and maintenance liabilities, with unique and quality assured results.

Why choose us?

We offer all types of designs, studies and management services for the traffic & highway theatre. Our schemes are completed with a return of investment or cost reduction answer included as standard.

Quality as Standard

With rapid growth as a leading innovator in the design of ITS and traffic signal projects, we are able to offer our customers a lot more today.

From Prince2 project management, site supervision, highway junction designs, ANPR solutions, travel plans to pedestrian crossings we can do it all.

Every aspect of our work has cost reduction and return of investment calculations built in.

We not only design schemes within budget and on time, but look to see how we can help our customers reduce the burden of outgoing costs, and make a profit.

We take the hassle and worry away from our customers, and provide answers. And complete traffic solutions. Please go to: www.totalsignals.com for more information on complete design and build packages.

Some of our services include:

- * Transport (LTP) designs
- * Highway layout designs
- * Traffic signal design and testing
- * Project management (Prince2)
- * Safety audits and appraisals
- * In-house consultations
- * ITS/UTMC/UTC designs
- * 'Quick win' scheme conceptions
