## Technologies - Innovation as a Guarantee

### Need to reduce costs?

Our products are all designed to give a full return of investment within 6 months. And generate a profit too.

### Want to have more efficiency?

We designed our technologies so more time can be spent being pro-active with the knowledge that we are taking care of your problems.

### Why choose our products

All our products are unique, and market leaders. With full endorsement and corporate backing, our products are guaranteed to produce the results you need. All your data is fully secure and guaranteed to be safe at anytime- and it's all accessible 24/7. From managing your data to automated fully auditable traffic counts, you be rest assured that your data and information won't be in safer hands than with us.

## Product Overview

### Juno

Unique, fully auditable vehicle classification and count system. 100% accurate and fully computerized camera and programming package. Juno uses Miovision technology to provide pedestrian and traffic movements on multi-lane junctions. Juno is a plug and play solution. The equipment and data can be hired, so no purchase necessary.

### ITSAM

Unique document control and approvals program. Completely secure web based system that allows confidence to be gained in all documentation and procedures carried out in traffic departments. Not just an asset management program, but a complete solution to halt missing or incorrect information ever be used again.

### Telstar

A complete plug and play package for communications with traffic signals, CCTV and ITS equipment. No more need for expensive phone lines or MESH systems. Telstar can be used on all existing equipment and inhouse stations, so there is no need for expenditure on upgrading equipment to suit. In association with O2, the mobile communications are more reliable, cost effective and efficient than any other communications system available.

### Clarity

Retro-fit ELV LED traffic signal aspects with full red lamp monitoring capabilities on existing Siemens ST800 & ST900 controllers and Microsense MTC and Sentinel controllers. Will fit into any halogen traffic signal housing, saving you costs of equipment replacement and labour.
